

Share Some Experience of Preparing the 70-246 Exam and My Real Test

I spent about one and a half month time preparing for the new [Monitoring and Operating a Private Cloud with System Center 2012 Certification Exam, i.e. exam 70-246](#)], and finally passed it with score 800. I wanna share some experience of preparing the 70-246 exam and my real test for anyone else who are preparing this exam. The main skills tested in the real 70-246 exam can be summarized as the following:

- (1) 15% ?20% part of the exam is test Configure Data Center Process Automation;
- (2) 20% ?25% part of the exam is test Deploy Resource Monitoring;
- (3) 20% ?25% part of the exam is test Monitor Resources;
- (4) 15% ?20% part of the exam is test Configure and Maintain Service Management;
- (5) 20% ?25% part of the exam is test Manage Configuration and Protection;

In my real test, there were total 45 questions, including 2 case studies, one has 8 questions and the other has 11 questions , then other 26 mixed questions. All the DITTO exam questions came from the [premium 70-246 182 Q&As vce file](#)].
